

Tahoe Area Plants & Animals

Handy pocket field guide with over 100 plant & animal species

Great Basin Outdoor School has compiled a thorough and useful guide for exploring the flora and fauna of our area! Our visitors continue to comment on how much information is in the guide, and how easy it is to bring along on their adventures. Thank you to GBOS for assembling such an informative piece.

*Stefanie Givens
Galena Creek Visitor Center,
past director*

"The Pocket Naturalist Guide to Tahoe Area Plants and Animals" is a wonderful guide to some of the more common animals and plants you will encounter in the Tahoe area. It's a handy reference that anyone in the outdoors will use again and again. And, as a bonus, it easily fits in your pocket -- no cumbersome book to carry around. Enjoy!
